CAREER OBJECTIVE

My goal is to become a well-rounded frontend developer capable of contributing to high-impact projects. I am eager to continuously learn, adapt to new challenges, and work in collaborative environments where I can grow both technically and professionally.

EDUCATION

BTEC FPT

2018 - 2020

Graphic design

Project-Based Training is a hands-on learning approach where students solve real business problems in team-based projects. It builds practical skills, industry readiness, and the ability to adapt quickly to real-world work environments.

Code school

2021 - 2022

Full stack course

My first exposure to programming, where I developed fundamental coding skills, problem-solving mindset, and an understanding of core programming concepts. This experience laid the groundwork for my continued journey into software development.

Tony Nguyen Course

March 2024 - April 2024

ReactJS course

This course is about using ReactJS to gain a deeper understanding of Foundations (JSX syntax, Components, Props and State, Event Handling, Conditional Rendering, Lists & Keys, Component Lifecycle)

WORK EXPERIENCE

Intersquad

26 May 2023 - Present

Frontend Developer

1. Card.Gift

A digital gifting platform for the Australian market. I was involved in optimizing and refining the UI, fixing bugs, and ensuring system stability. Currently, most of Card.Gift's interface has been implemented by me.

2. Storage King Mobile App

An upgrade project for Storage King mobile app in Australia, focusing on UI optimization, bug fixing, and performance improvements.

3. Philip Chun

A corporate website for a construction consultancy company in Australia. The project featured a simple interface and was completed in 2 weeks, with the remaining work pending domain setup and deployment by the client.

4. Storage King Career

A recruitment website for Storage King in Australia. I was responsible for managing components and content on Shopify, ensuring that all strict client requirements were met.

5. ODUS

A promotional animation website for a company in Australia. This was my first experience working with animations, but after thorough research, I completed a demo in 2 weeks and refined it based on client feedback.

6. Storage King Web App

A redesign project for Storage King web platform in Australia. I am responsible for migrating components from Ionic to NextJS to enhance performance and maintainability.

7. Card.Gift Checkout

A new custom-built checkout solution designed to replace the existing payment flow on the Card.Gift platform. The system aims to improve performance, user experience, and scalability. It was developed to streamline the purchasing process and will soon be deployed as the default checkout for all users.

Dienmaytot

Jan 2025 - Feb 2025

Freelance Frontend Developer

An e-commerce website in Vietnam specializing in electronic appliances. I implemented the project using a pre-built template with simple requirements, completing it within a short timeframe..
